

Geomorphology of the Badlands

An outdoor investigation of the ever-changing Badlands.

Top 3 Experiences:

Touch and hold dinosaur fossils found in DPP

Hike in the Badlands

Observe the recent erosion that was left by the last ice-age

Grade: 7-9

Cost: \$7/student

Duration: 2-2.5 hrs

Book a program:

403.378.4344

*Dinosaur Provincial Park
is located 48km NE of
Brooks, Alberta*
albertaparks.ca/dinosaur

This program will bring learners into the badlands to investigate the changing sedimentary rock around them. How are piping channels formed?

What exactly 'defines' a hoodoo?

Why are there badlands in the first place?

Study the geomorphology of Dinosaur Provincial Park.

Prepare for the Badlands:

Classes travelling to Dinosaur Provincial Park should be prepared by wearing closed toed shoes, appropriate layers, and bringing water.

Curriculum Outcomes:

General: Earth Science
Scientific Inquiry
Nature of Science
7 - Planet Earth
8 - Freshwater Systems

Have a special focus or classroom inquiry? We also offer custom hikes and in-class presentations to meet your needs!
